INDEX OF AUTHORS VOLUME 11

A

ALVARADO-MALLART, R-M and PINÇON-RAYMOND, M. The palisade endings of cat extraocular muscles: A light and electron microscopic study 567
AUBER-THOMAY, M. Changes in fine structure of the ventral intersegmental abdominal muscles in the adult of *Rhodnius prolixus* 655

B

BEAULATON, J. *See* LOCKSHIN AND BEAULATON 803
BELTZ, B. and GELPERIN, A. An ultrastructural analysis of the salivary system of the terrestrial mollusc, *Limax maximum* 31
BENNETT, D. C. *See* HINSCH and BENNETT 345
BOCK, K. L. *See* EASTWOOD, WOOD, BOCK and SORENSON 553
BROWNING, J. *Octopus* microvasculature: Permeability to ferritin and carbon 371
BURWEN, S. J. *See* EMERMAN, BURWEN and PITELKA 109
BUTTERFIELD, C. E. *See* KADISH, BUTTERFIELD and FOLKMAN 99

C

CAHILL, M. B. *See* TICE, CARTER and CAHILL 293
CARTER, R. L. *See* TICE, CARTER and CAHILL 293
CAYER, M. L. *See* NOIROT, SMITH, CAYER and NOIROT-TIMOTHÉE 325
—, *See* HYDER, MEYERS and CAYER 597
CHANG, J. P., MAYAHARA, H., YOKOYAMA, M., UBUKATA, A. and MOLLER, P. C. An ultrastructural study of morphogenesis of fibrogranular complex and centriole in ductuli efferentes of Chinese hamster 401
CHEMES, H. E. *See* FAWCETT and CHEMES 147
CHENG, M. *See* NAG, HEALY and CHENG 231
CIOFFI, M. The morphology and fine structure of the larval midgut of a moth (*Manduca sexta*) in relation to active ion transport 467

D

DALY, J. W. *See* NEUWIRTH, DALY, MYERS and TICE 755
DAVIS, W. L., JONES, R. G. and HAGLER, H. K. Calcium containing lysosomes in the normal chick duodenum: A histochemical and analytical electron microscopic study 127
—, *See* PETIT, DAVIS and JONES 633
DESSER, S. S. and WELLER, I. Ultrastructural observations on the granular leucocytes of the tuatara *Sphenodon punctatus* 703
—, —, Ultrastructural observations on the erythrocytes and thrombocytes of the tuatara *Sphenodon punctatus* 717
DUVERT, M. and SALAT, C. Fine structure of muscle and other components of the trunk of *Sagitta setosa* (chaetognath) 217

E

EASTWOOD, A. B., WOOD, D. S., BOCK, K. L. and SORENSON, M. M. Chemically skinned mammalian skeletal muscle. I. The structure of skinned rabbit psoas 553
ECKELBARGER, K. J. Ultrastructural evidence for both autosynthetic and heterosynthetic yolk formation in the oocytes of an annelid (*Phragmatopoma lapidosa;* Polychaeta) 425
EMERMAN, J. T., BURWEN, S. J. and PITELKA, D. R. Substrate properties influencing ultrastructural differentiation of mammary epithelial cells in culture 109

F

FAHRENBACH, W. H. The brain of the horseshoe crab (*Limulus polyphemus*) III. Cellular and synaptic organization of the corpora pedunculata 163
FAWCETT, D. W. and CHEMES, H. E. Changes in distribution of nuclear pores during differentiation of the male germ cells 147
FILSHIE, B. K. and HADLEY, N. F. Fine structure of the cuticle of the desert scorpion, *Hadrurus arizonensis* 249
—, —, *See* HADLEY and FILSHIE 263
FOLKMAN, J. *See* KADISH, BUTTERFIELD and FOLKMAN 99
FRANZINI-ARMSTRONG, C. Aggregates of particles on the plasmalemma of striated muscle from a spider 209

G

GELPERIN, A. *See* BELTZ and GELPERIN 31
GEORGE, D. Gap and tight junctions in tunicates 781
GILBERT, L. I. *See* SEDLAK and GILBERT 643
GLOSTER, J. A. *See* WARD, GLOSTER and HARRIS 793
GOMEZ-RAMOS, P. and RODRIGUEZ-ECHANDIA, E. L. The fine structural effect of sialectomy on the taste bud cells in the rat 19
GREEN, L. F. B. The fine structure of the light organ of the New Zealand glow-worm *Arachnocampa luminosa* (Diptera: Mycetophilidae) 457

—, Regional specialization in the Malpighian tubules of the New Zealand glow-worm *Arachnocampa luminosa* (Diptera: Mycetophilidae). The structure and function of Type I and II cells 673

H

HADLEY, N. F. and FILSHIE, B. K. Fine structure of the epicuticle of the desert scorpion, *Hadrurus arizonensis*, with reference to location of lipids 263
—, —, *See* FILSHIE and HADLEY 249
HAGLER, H. K. *See* DAVIS, JONES and HAGLER 127
HARRIS, P. *See* WARD, GLOSTER and HARRIS 793
HEALY, C. J. *See* NAG, HEALY and CHENG 231
HENTSCHEL, H. The kidney of a teleost (*Spinachia spinachia*) 2. Histochemical identification of silaic acid-containing glyco-protein and fine structure of mucus secreting cells 517
HILFER, S. R. Follicle formation in the embryonic chick thyroid. III. Initiation of follicle formation 727
HINSCH, G. W. and BENNETT, D. C. Vitellogenesis stimulated by thoracic ganglion implants into destalked immature female spider crabs, *Libinia emarginata* 345
HOLLAND, N. D. Electron microscopic study of the cortical reaction of an ophiuroid echinoderm 445
HORI, I. Structure and regeneration of the planarian basal lamina 611
HOWARD, J. *See* RUBIN, HOWARD and LEONARDI 413
HUIE, P. *See* LOCKE and HUIE 277
HUNT, S. The structure and composition of the love-dart (gypsobelum) in *Helix pomatia* 51
HYDER, S. L., MEYERS, A. and CAYER, M. L. Membrane modulation in a methylotrophic bacterium *Methylococcus capsulatus* (Texas) as a function of growth substrate 597

I

IRISH, M. J. and WILSON, F. J. The structure of A-segments from glycerinated skeletal muscle 201

J

JONES, R. G. *See* DAVIS, JONES and HAGLER 127
—, *See* PETIT, DAVIS and JONES 633
JUBERTHIE-JUPEAU, L. Cellular junctions of the midgut in the centipede *Scutigerella pagesi* as revealed by lanthanum tracer and freeze-fracture techniques 317

K

KADISH, J. L., BUTTERFIELD, C. E. and FOLKMAN, J. The effect of fibrin on cultured vascular endothelial cells 99
KELLY, T. J. and TELFER, W. H. The function of the follicular epithelium in vitellogenic *Oncopeltus* follicles 663
KEOUGH, E. M. and WOOD, B. G. Mammary gland development during pregnancy in the dwarf mouse mutant *little* 773
KORTE, G. E. Unusual association of 'chloride cells' with another cell type in the skin of the glass catfish *Kryptopterus bicirrhis* 63

L

LANE, N. J. Intramembranous particles in the form of ridges, bracelets or assemblies in arthropod tissues 1
—, Freeze-fracture and tracer studies on the intercellular junctions of insect rectal tissues 481
LEONARDI, C. *See* RUBIN, HOWARD and LEONARDI 413
LOCKE, M. and HUIE, P. Apolysis and the turnover of plasma membrane plaques during cuticle formation in an insect 277
LOCKSHIN, R. A. and BEAULATON, J. Programmed cell death. Electrophysiological and ultrastructural correlations in metamorphosing muscles of lepidopteran insects 803

INDEX OF SUBJECTS VOLUME 11

A

A-segments, structure of, from glycerinated skeletal muscle, 201
Achlya, fungus, freeze-fracture study of hormone-induced branching in, 585
Active transport, morphology and fine structure of the larval midgut of a moth (*Manduca sexta*) in relation to, 467
Amblema, fresh water mussel, morphological studies on periostracum of, 633
Amphibian, heart, organ culture of, 231
—, poison-dart frogs (Dendrobatidae), glands in skin of, 755
Annelid, *Phragmatopoma lapidosa* (Polychaeta), yolk formation in eggs of, 425
Annulate lamellae, in human tumor cells, 139
Anolis carolinensis, lizard, mesaxons in central myelin of 353
Aplysia californica, mollusc, gill epithelium of, 337
Apolysis, and the turnover of plasma membrane plagues during cuticle formation in an insect, 227
Arachnocampa luminosa, New Zealand glow-worm, Malpighian tubules of, 673
—, —, —, —, —, —, light organ of, 457
Arthropod, centipede *Scutigerella pagesi*, midgut of, 317
—, scorpion, fine structure of cuticle of, 249
—, —, fine structure of eoicuticle of, 263
—, spider, striated muscle of, 209
—, spider crab, vitellogensis in, 345
—, (Insect). *See* Insect
Assemblies, intramembranous particles in the form of ridges, bracelets and, in arthropod tissues, 1
Autoradiography, -EM, of oleic acid in guinea-pig heart, 793
Axons, of an osmoconforming bivalve, physiologically induced changes in intramembranous particle frequency in, 507

B

Bacterium, methylotrophic, membrane modulation in, 597
Basal lamina, structure and regeneration of, in a planarian, 611
Bird, chick, follicle formation in thyroid of, 727
—, —, calcium-containing lysosomes in duodenum of, 127
—, hen, glycerinated skeletal muscle of, 201
Blood, erythrocytes and thromobocytes of the tuatara, 717
—, granular leucocytes of the tuatara, 703
— cells, in an insect, 69
Brain, of horseshoe crab *Limulus*, cellular and synaptic organization of the corpora pedunculata, 163

C

Calcium, -containing lysosomes, in chick duodenum, 127
Cell death, programmed, electrophysiological and ultrastructural correlations in metamorphosing muscles of lepidopteran insects, 803
Centipede, *Scutigerella*, cellular junctions of midgut of, 317
Centriole, and fibrogranular complex, morphogenesis of, 401
Cervix, of the ewe, cyclic changes in the surface structure of, as revealed by scanning electron microscopy, 359
Chaetognath, *Sagitta*, fine structure of muscle and other components of the trunk of, 217
Chemically skinned muscle, rabbit psoas, 553
'Chloride cells' association of with another cell type, in skin of the glass catfish *Kryptopterus bicirrhis*, 63
Cilia, distinctive features of, in metazoans, and their significance for systematics, 385
Circulatory system, Octopus microvasculature: Permeability to ferritin and carbon, 371
— —, organ culture of adult amphibian heart, 231
— —, vascular endothelial cells, cultured, 99
Corpora pedunculata, cellular and synaptic organization in, in brain of the horseshoe crab *Limulus*, 163
Cortical reaction, of an ophiuroid echinoderm, EM study of, 445
Cuticle, epi-, of desert scorpion *Hadrurus arizonensis*, fine structure of, 263
—, formation, in an insect, apolysis and the turnover of plasma membrane plaques during, 277
—, of desert scorpion *Hadrurus arizonensis*, fine structure of, 249
Cycle, moulting, in an insect, 69

D

Differentiation, of male germ cells, changes in distribution of nuclear pores during, 147
—, of mammary epithelial cells, in culture, 109
Digestive system, chick duodenum, calcium-containing lysosomes in, 127
— —, intestinal crypt cells, of rat, changes in tight junctions in, associated with changes in mitotic activity, 293

— —, larval midgut of *Manduca*, 467
— —, of centipede, cellular junctions in midgut of, 317
Ductuli efferentes, of Chinese hamster, ultrastructural study of morphogenesis of fibrogranular complex and centriole in, 401
Duodenum, chick, calcium-containing lysosomes in, 127

E

Echinoderm, ophiuroid, EM study of cortical reaction in, 445
Electrophysiology, correlated with ultrastructure in metamorphosing insect muscles, R
Embryo, of an ophiuroid echinoderm, 445
Embryonic cells, differential response of, to culture on tissue matrices, 89
Endothelial cells, vascular, effect of fibrin on cultured, 99
Epidermal cell, structure, correlations between, and endogenous hormone titers in *Manduca*, 643
— —s, mammary, in culture, 109
Epithelium, gill, of a mollusc *Aplysia californica*, rhombic particle arrays in, 337
—, follicular, function of, in vitellogenic *Oncopeltus* follicles, 663
Erythrocytes, of tuatara, ultrastructural observations on, 717
Excretory system, insect rectal sheath cells, 325
— —, intercellular junctions in insect rectal tissues, 481
— —, kidney, of a teleost, 517
— —, Malpighian tubules, developmental changes in, 533
— —, — —, in New Zealand glow-worm, 457

F

Ferritin, and carbon, Octopus microvasculature, permeability to, 371
Fibrin, effect of, on cultured vascular endothelial cells, 99
Fibrogranular complex, an ultrastructural study of morphogenesis of, and centriole, in ductuli efferentes of Chinese hamster, 401
Fish, *Kryptopterus bicirrhis*, skin of, 63
—, teleost, glycoprotein and mucus secreting cells in kidney of, 517
Follicle formation, in embryonic chick thyroid. III. Initiation of follicle formation, 727
Follicles, of *Oncopeltus*, function of the follicular epithelium in vitellogenic, 663
Freeze-fracture, and protein tracer analysis of 'occluding' junctions at mesaxons of central myelin, 353
—, and tracer studies on the intracellular junctions of insect rectal tissues, 481
—, gap and tight junctions in tunicates, 781
—, gap junctions between Sertoli and germ cells of rat seminiferous tubules, 741
—, of centipede midgut, 317
—, of gill epithelium of a mollusc, 337
—, of insect rectal sheath cells, 325
—, of male germ cells, mammalian, 147
—, of plasmalemma of striated muscle of a spider, 209
—, of rat intestinal crypt cells, 293
—, study of hormone-induced branching in the fungus *Achlya*, 585
Fungus, *Achlya*, hormone-induced branching in, 585

G

Ganglion, thoracic, in female spider crab, stimulation of vitellogenesis by implantation of, 345
Gap junctions, and tight junctions, in tunicates, 781
— —, between Sertoli and germ cells, 741
Gill epithelium, of a mollusc, rhombic particle arrays in, 337
Glands, salivary, effect of removal of, on taste bud cells, 19
Glycerinated muscle, the structure of A-segments from, 201
Glycoprotein, sialic acid containing, in kidney of a teleost, 517
Granular secretory glands, morphology of, in skin of poison-dart frogs, 755
Gypsobelum, love dart, in *Helix pomatia*, structure and composition of, 51

H

Heart, adult amphibian, organ culture of, 231
—, isolated perfused, guinea-pig, incorporation and distribution of ^{3}H-oleic acid in, 793
Hormone, -induced branching, in fungus *Achlya*, 585
—, titres, endogenous, correlations between epidermal cell structure and, during the fifth larval instar of *Manduca sexta*, 643
Human, tumor cells, annulate lamellae in, 139

I

Innervation, of the periarteriolar lymphatic system of the spleen, 121
Insect, *Arachnocampa luminosa*, light organ of, 457
—, — —, Malpighian tubules of, 673
—, *Calpodes ethlius*, apolysis in, 277
—, developmental changes in Malpighian tubule cell structure in, 533
—, *Manduca sexta*, larval midgut of, 467
—, *Oncopeltus*, function of follicular epithelium in, 663
—, rectal sheath cells, organization and isolating function of, 325
—, *Rhodnius*, plasmatocytes and oenocytoids during the moulting cycle in, 69
—, —, changes in fine structure of abdominal muscles in adult of, 655
—s, lepidopteran, electrophysiological and ultrastructural correlation in metamorphosing, 803
Intercellular junctions, of insect rectal tissues, 481
Intersegmental muscles, ventral abdominal, changes in fine structure of, in adult of *Rhodnius*, 655
Intramembranous particles, in arthropod tissues, 1
— —, *see* Freeze-fracture

J

Junctions, cellular, of midgut of centipede, 317
Junctions, gap, between Sertoli and germ cells of rat seminiferous tubules, 741
—, gap and tight, in tunicates, 781
—, intercellular, of insect rectal tissues, 481
—, 'occluding' at mesaxons of central myelin in *Anolis carolinensis* are not tight: A freeze-fracture and protein tracer analysis, 353
—, tight, of rat intestinal crypt cells, changes in, associated with changes in their mitotic activity, 293
—, *see also* Freeze-fracture,

K

Kidney, of a teleost *Spinachia spinachia*. 2. Histochemical indentification of a sialic acid-containing glycoprotein and fine structure of mucus secreting cells in, 517

L

Lamellae, annulate, in human tumor cells, 139
Larval instar, fifth, epidermal cell structure and hormone titers in, 643
Leaf, ultrastructural characteristics of, in *Hydrilla*, 79
Leucocytes, granular, of tuatara, ultrastructural observations on, 703
Libinia emarginata, spider crab, vitellogenesis in, 345
Light organ, of New Zealand glow-worm *Arachnocampa luminosa* (Diptera: Mycetophilidae), fine structure of, 457
Limulus polyphemus, horshoe crab, brain of, 163
Lipids, location of, in epicuticle of a scorpion, 263
Love dart, in *Helix pomatia*, structure and composition of, 51
Lymphatic system, of spleen, 121
Lysosomes, calcium-containing, in the chick duodenum: Histochemical and analytical EM study, 127

M

Malpighian tubule, cell structure, developmental changes in, 533
— —s, of New Zealand glow-worm, 457, 673
Mammal, cat, extraocular muscles of, 567
—, chemically skinned skeletal muscle of, 553
—, Chinese hamster, fibrogranular complex and centriole morphogenesis in ductuli efferentes of, 401
—, ewe, cyclic changes in the surface structure of the cervix of, SEM study, 359
—, germ cells of male, changes in distribution of nuclear pores in, 147
—, glycerinated skeletal muscle of, 201
—, guinea-pig, incorporation and distribution of ^{3}H-oleic acid in isolated perfused heart of, 793
—, mouse, mutant *little*, mammary gland development in, 773
—, rat, intestinal crypt cells, tight junctions in, 293
—, —, seminiferous tubules, gap junctions in, 741
Mammary cells, epithelial, substrate properties influencing differentiation of, 109
Mammary gland, development, during pregnancy, in the dwarf mouse mutant *little*, 773
Manduca sexta, moth larva, correlations between epidermal cell structure and endogenous hormone titers in, 643
Matrices, tissue, differential response of embryonic cells to culture on, 89
Membrane, plasma, turnover of, during apolysis, in an insect, 277
—, plasmalemma of striated muscle of a spider, freeze-fracture study, 209
—s, of arthropod tissues, freeze-fractured, 1
—, of midgut of centipede, freeze-fractured, 317
Membrane modulation, in a methylotrophic bacterium, *Methylococcus capsulatus*, as a function of substrate, 597
Methane, -oxidizing bacterium, 597
Methylococcus capsulatus, bacterium, 597
Microtubules, ciliary, in metazoans, 385
Microvasculature, Octopus, permeability to ferritin and carbon, 371
Midgut, larval, of a moth *Manduca sexta*, morphology and fine structure of, in relation to active ion transport, 467
—, of centipede *Scutigerella pagesi*, cellular junctions of, as revealed by lanthanum tracer and freeze-fracture techniques, 317
Mitotic activity, in intestinal cells, changes in tight junctions associated with, 293
Models, Triton X-100, of normal and transformed cells, 413
Mollusc, *Amblema* (Uniondae), periostracum of, 633
—, *Aplysia californica*, rhombic particle arrays in gill epithelium of, 337
—, gastropod, *Notoacmea scutum*, sensory cells of, 623
—, *Helix pomatia*, structure and composition of love dart, 51
—, *Limax maximum*, salivary system of, 31
—, *Octopus*, microvasculature of, 371
—, osmoconforming bivalve, axons of, 507
Moulting cycle, in an insect, secretory activities of plasmatocytes and oenocytoids during, 69
Moulting, in an insect, turnover of plasma membrane plaques during, 277
Mucus cells, in kidney of a teleost, 517
Muscle, and other components of the trunk of *Sagitta setosa* (Chaetognatha), 217
—, cardiac, incorporation and distribution of ^{3}H-oleic acid in, 793
—, skeletal, chemically skinned, 553
—, —, structure of A-segments from glycerinated, 201
—, striated, from a spider, aggregates of particles on the plasmalemma of, 209
—s, intersegmental abdominal, changes in fine structure of, in adult of *Rhodnius* 655
—, metamorphosing, lepidopteran, electrophysiological and ultrastructural correlations in, 803
—, the palisade endings of cat extraocular, 567
Mutant, dwarf mouse, little, mammary gland development in, 773
Myelin, central, in *Anolis*, 353

N

Nervous system, axons of an osmoconforming bivalve, physiologically induced changes in, 507
— —, freeze-fracture and protein tracer analysis of 'occluding' junctions in mesaxons of central myelin, 353
— —, innervation of the periarteriolar lymphatic sheath of the spleen, 121
— —, thoracic ganglion implants, stimulation of vitellogenesis by, in destalked immature female spider crabs, 345
— —, the brain of the horseshoe crab *Limulus polyphemus*. III. Cellular and synaptic organization of the corpora pedunculata, 163
— —, the palisade endings of cat extraocular muscles, a light and EM study, 567
Notoacmea scutum, gastropod, sensory cells of mantle of, 623
Nuclear pores, changes in distribution of, during differentiation of male germ cells, 147
Nucleus, changes in distribution of pores in, during differentiation, 147

O

Octopus, microvasculature, permeability of to ferritin and carbon, 371
Oenocytoids, and plasmatocytes, secretory activities of, during the moulting cycle in an insect *Rhodnius*, 69
Oleic acid, -^{3}H, incorporation and distribution of, in the isolated perfused guinea-pig heart: A biochemical and EM autoradiographic study, 793
Oncopeltus, insect, function of follicular epithelium in, 663
Oocytes, of an annelid, *Phragmatopoma lapidosa* (Polychaeta), ultrastructural evidence for both autosynthetic and heterosynthetic yolk formation in, 425
Ophiuroid, echinoderm, EM study of cortical reaction in, 445
Organ culture, of adult amphibian heart, 231

P

Palisade endings, of cat extraocular muscle, 567
Particle frequency, intramembranous, physiologically induced changes in, in axons of an osmoconforming bivalve, 507
Particles, aggregates of, on the plasmalemma of spider muscle, 209
—, intramembranous, in insect rectal tissues, 481
—, —, in arthropod tissues, 1
—, rhombic arrays of, in gill epithelium of a mollusc, 337
Periarteriolar, lymphatic sheath, of spleen innervation of, 121
Periostracum, of fresh water mussel *Amblema*, morphological studies on, 633
Phragmatopoma lapidosa, polychaete, yolk formation in oocytes of, 425
Planarian, structure and regeneration of basal lamina in, 611
Plant, *Hydrilla*, ultrastructural characteristics of leaf tissue of, 79
Plasma membrane, plaques, turnover of, during apolysis, 277
Plasmatocytes, and oenocytoids, secretory activities of, during the moulting cycle in an insect, 69
Platyhelminth, structure and regeneration of the planarian basal lamina, 611
Pores, nuclear, changes in distribution of, in male germ cells, 147
Psoas, rabbit, chemically skinned, 553

R

Rat, taste bud cells of, effect of sialectomy on, 19
Rectal sheath cells, insect, organization and isolating function of, 325
Regeneration, structure and, of planarian basal lamina, 611
Reproductive system, cyclic changes in the surface structure of the cervix of the ewe, 359
— —, ductuli efferentes of Chinese hamster, 401
— —, function of follicular epithelium, 663
— —, gap junctions between Sertoli and germ cells of rat seminiferous tubules, 741
— —, mammary gland development during pregnancy in the dwarf mouse mutant little, 773
— —, mammalian germ cells, 147
— —, yolk formation in oocytes of an annelid, 425
Respiratory system, gill epithelium of a mollusc, 337
Rhodnius prolixus, insect, 69, 655
Reptile, *Anolis carolinensis*, 353
—, *Sphenodon punctatus*, 703, 717

S

Sagitta setosa, chaetognath, muscle of, 217
Salivary glands, effect of removal of, on taste bud cells, 19
— system, of terrestrial mollusc *Limax*, ultrastructural analysis of, 31
Scorpion, desert, *Hadrurus arizonensis*, fine structure of cuticle of, 249
—, —, — —, fine structure of epicuticle of, with reference to location of lipids, 263
Scutigerella pagesi, centipede, midgut of, 317
Secretory glands, granular, in skin of poison-dart frogs, Morphology of, 755
SEM, cyclic changes in the surface structure of the cervix of the ewe, 359
—, of the periostracum of the fresh water mussel *Amblema*, 633
Seminiferous tubules, of rat, gap junctions between Sertoli and germ cells in, 741
Sensory cells, ultrastructure of, on mantle of a gastropod, 623
— nervous system, fine structural effects of sialectomy on the taste bud cells in the rat, 19
— — —, ultrastructure of sensory cells on the mantle tentacles of the gastropod *Notoacmea*, 623

Sertoli cells, and germ cells, of rat, gap junctions between, 741
Sialectomy, fine structural effect of, on taste bud cells in the rat, 19
Sialic acid, -containing glycoprotein, in kidney of a teleost, 517
Skin, of glass catfish, unusual association of 'chloride cells' with another cell type in, 63
—, of poison-dart frogs, morphology of granular secretory glands in, 755
Slug, *Limax maximum*, salivary system of, 31
Snail, *Helix pomatia*, love dart (gypsobelum) of, 51
Sphenodon punctatus, lizard, blood cells of, 703, 717
Spider, aggregates of particles on plasmalemma of muscle of, 209
Spinachia spinachia, teleost, kidney of, 517
Spleen, innervation of periarteriolar lymphatic sheath of, 121
Substrate properties, influencing ultrastructural differentiation, in mammary epithelial cells in culture 109
Synaptic organization, or corpora pedunculata, in brain of *Limulus*, 163

T

Taste bud, cells, rat, effect of sialectomy on, 19
Thrombocytes, of tuatara, ultrastructural observations on, 717
Thyroid, embryonic chick, follicle formation in, 727
Tight junctions, and gap junctions, in tunicates, 781
— —, of rat intestinal crypt cells, changes in, 293
Tissue culture, differential response of embryonic cells to culture on tissue matrices, 89
— —, organ culture of adult amphibian heart, 231
— —, substrate properties influencing ultrastructural differentiation in mammary epithelial cells in culture, 109
— —, the effect of fibrin on cultured vascular endothelial cells, 99
Tissue matrices, differential response of embryonic cells to culture on, 89
Tracer, carbon, 371
—, ferritin, 371
—, lanthanum, 317, 481
—, protein, 353
— studies, in insect rectal tissues, 481
Transformed cells, a biochemical and ultrastructural comparison of Triton X-100 models of normal and, 413
Triton X-100 models, of normal and transformed cells, 413
Tumor cells, human, annulate lamellae in, 139
Tunicates, gap and tight junctions in, 781

V

Vascular endothelial cells, cultured, effect of fibrin on, 99
Vitellogenesis, autosynthetic and heterosynthetic, in an annelid, 425
—, stimulated by thoracic ganglion implants into destalked immature female spider crabs, 345
Vitellogenic follicles of *Oncopeltus*, function of follicular epithelium in, 663

Y

Yolk, vitellogenesis stimulated by thoracic ganglion implants, in a crab, 345
— formation, in the oocytes of an annelid *Phragmatopoma*, 425
